### ABOUT ME

Functional tester with 2 years of experience in software quality validation and verification. Committed to ensuring that the final product aligns with user needs and requirements. I execute test cases, detect and report defects, and thoroughly follow up until resolution. I work closely with the development team, achieving a reduction in defect resolution times and early identification of risks. I apply both manual and automated testing strategies, ensuring high-quality products that meet end-user expectations.

---

### TECHNICAL SKILLS

- Software Testing: Planning, designing, and executing test cases; session-based exploratory testing; defect reporting and lifecycle tracking.
- Agile Methodologies: SCRUM and Kanban.
